

Fourth Quarter Investor Relations Update January 10, 2019

General Overview

- Early adoption of Lease Accounting Standard Accounting Standards Update (ASU) 2016-02: Leases (Topic 842) (the New Lease Standard) is effective for fiscal years beginning after December 15, 2018. The New Lease Standard requires leases to be recognized on the balance sheet as liabilities with corresponding right-of-use assets. In the fourth quarter of 2018, the company elected to early adopt this new standard as of January 1, 2018, which was driven by a third quarter 2018 revision to the New Lease Standard no longer requiring the recast of prior reporting periods. The company expects its fourth quarter pre-tax income excluding net special items to increase by approximately \$55 million related to the adoption of the New Lease Standard, of which a significant portion relates to prior quarters. Of this amount, approximately \$35 million is a net increase to operating income and approximately \$20 million is an increase to nonoperating income.
- Special items The company expects its total pre-tax net special items in the fourth quarter will approximate \$250 million¹. Net special items principally
 include fleet restructuring expenses, merger integration expenses, certain aircraft rent expense associated with the New Lease Standard outlined above, and
 mark-to-market adjustments for bankruptcy obligations and equity investments.
- Revenue The company now expects its fourth quarter total revenue per available seat mile (TRASM) to be up approximately 1.5 percent year-over-year, at the lower end of its previous guidance range of up 1.5 to up 3.5 percent. This change is due primarily to a lower than anticipated improvement over a strong fourth quarter of 2017 in the domestic market.
- CASM The company continues to expect fourth quarter consolidated CASM excluding fuel and special items to be between down 1.0 percent to up 1.0 percent¹ year-over-year.
- Liquidity As of December 31, 2018, the company had approximately \$7.6 billion in total available liquidity, comprised of unrestricted cash and investments of \$4.8 billion and \$2.8 billion in undrawn revolver capacity. The company also had a restricted cash position of \$154 million.
- Shares outstanding The fully diluted weighted average sharecount for the fourth quarter was approximately 462 million and for the full year the fully diluted weighted average sharecount was approximately 466 million.
- EPS Based on the assumptions outlined above, the company now expects to report full year 2018 earnings per diluted share of between \$2.92 and \$3.12 and earnings per diluted share, excluding special items, of between \$4.40 and \$4.60.

Notes:

1. For a reconciliation of special items (including the company's estimates for the fourth quarter), please see the GAAP to non-GAAP reconciliation at the end of this document.

Fourth Quarter GAAP to Non-GAAP Reconciliation January 10, 2019

The company sometimes uses financial measures that are derived from the consolidated financial statements but that are not presented in accordance with GAAP to understand and evaluate its current operating performance and to allow for period-to-period comparisons. The company believes these non-GAAP financial measures may also provide useful information to investors and others. These non-GAAP measures may not be comparable to similarly titled non-GAAP measures of other companies, and should be considered in addition to, and not as a substitute for or superior to, any measure of performance, cash flow or liquidity prepared in accordance with GAAP. The company is providing a reconciliation of reported non-GAAP financial measures to their comparable financial measures on a GAAP basis. The table below presents the reconciliation of total operating costs (GAAP measure) to total operating costs excluding special items and fuel (non-GAAP measure). Management uses total operating costs excluding special items and fuel to evaluate the company's current operating performance and for period-to-period financial performance. Additionally, special items may vary from period-to-period in nature and amount. These adjustments to exclude aircraft fuel and special items allow management an additional tool to better understand analyze the company's non-fuel costs and core operating performance. Additionally, the table below presents the sent non-operating expense excluding special items (non-GAAP measure). Management uses the reconciliation of other non-operating expense excluding special items (non-GAAP measure) to other non-operating expense excluding special items (non-GAAP measure). Management uses this non-GAAP financial measures to evaluate the company's current operating performance. Additionally, the table below presents the econciliation of other non-operating expense excluding special items (non-GAAP measure). Management uses this non-GAAP financial measure to evaluate the company's current performance and to allow for p
