Statements in this report contain various forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which represent the Company's expectations or beliefs concerning future events. When used in this report, the words "expect", "forecast", "anticipates" and similar expressions are intended to identify forward-looking statements. All such statements are based on information available to the Company on the date of this report. The Company undertakes no obligation to update or revise any forward-looking statement, regardless of reason. This discussion includes forecasts of costs per ASM, capacity, traffic, fuel cost and fuel consumption, and demand, each of which is a forward-looking statement. There are a number of factors that could cause actual results to differ materially from our forecasts. Such factors include, but are not limited to: the continuing impact of the events of September 11, 2001 on the Company, the impact of the recent bankruptcies of United Airlines and US Airways, general economic conditions, competitive factors within the airline industry which could affect the demand for air travel, changes in the Company's business strategy, and changes in commodity prices. For additional information regarding these and other factors see the Company's filings with the Securities and Exchange Commission, including but not limited to the Company's Form 10-K for the year ended December 31, 2002.

First Quarter Update

Since AMR did not hold a conference call following the release of our earnings, we want to provide some guidance, which normally would have been covered during the call. The attached information is more comprehensive than our normal Eagle Eye update for this reason.

Please call if you have any questions.
