Statements in this report contain various forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which represent the Company's expectations or beliefs concerning future events. When used in this document, the words "expects", "plans," "anticipates," "indicates," "believes," "forecast," "guidance," "outlook", "may," "will," "should" and similar expressions are intended to identify forward-looking statements. Forward-looking statements include, without limitation, the Company's expectations concerning operations and financial conditions, including changes in capacity, revenues and costs; future financing plans and needs; overall economic and industry conditions; plans and objectives for future operations; and the impact on the Company of its results of operations in recent years and the sufficiency of its financial resources to absorb that impact. Other forward-looking statements include statements which do not relate solely to historical facts, such as, without limitation, statements which discuss the possible future effects of current known trends or uncertainties, or which indicate that the future effects of known trends or uncertainties cannot be predicted, guaranteed or assured. All forward-looking statements in this report are based on information available to the Company on the date of this report. The Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise. This document includes forecasts of unit cost and revenue performance, fuel prices and fuel hedging, capacity and traffic estimates, other income/expense estimates, share count, and statements regarding the Company's liquidity, each of which is a forward-looking statement. Forward-looking statements are subject to a number of factors that could cause the Company's actual results to differ materially from the Company's expectations. The following factors, in addition to other possible factors not listed, could cause the Company's actual results to differ materially from those expressed in forward-looking statements: the materially weakened financial condition of the Company, resulting from its significant losses in recent years; the ability of the Company to generate additional revenues and significantly reduce its costs; changes in economic and other conditions beyond the Company's control, and the volatile results of the Company's operations; the Company's substantial indebtedness and other obligations; the ability of the Company to satisfy existing financial or other covenants in certain of its credit agreements; continued high fuel prices and further increases in the price of fuel, and the availability of fuel; the fiercely competitive business environment faced by the Company, and historically low fare levels; competition with reorganized and reorganizing carriers; the Company's reduced pricing power; the Company's likely need to raise additional funds and its ability to do so on acceptable terms; changes in the Company's business strategy; government regulation of the Company's business; conflicts overseas or terrorist attacks; uncertainties with respect to the Company's international operations; outbreaks of a disease (such as SARS or avian flu) that affects travel behavior; uncertainties with respect to the Company's relationships with unionized and other employee work groups; increased insurance costs and potential reductions of available insurance coverage; the Company's ability to retain key management personnel; potential failures or

disruptions of the Company's computer, communications or other technology systems; changes in the price of the Company's common stock; and the ability of the Company to reach acceptable agreements with third parties. Additional information concerning these and other factors is contained in the Company's Securities and Exchange Commission filings, including but not limited to the Company's Annual Report on Form 10-K for the year ended December 31, 2005.

This Eagle Eye provides updated guidance for the fourth quarter and the full year 2006.

Performance Update

Costs: Unit cost forecasts are attached.

Revenue: Fourth quarter mainline passenger unit revenue is expected to increase between 3.8% and 4.8% year over year. Fourth quarter consolidated passenger unit revenue is expected to increase between 3.6% and 4.6% year over year. In the Other Revenue category, year over year improvements are expected to continue to moderate as prior year comparables become more difficult.

Liquidity: We expect to end the fourth quarter with a cash and short-term investment balance over \$5 billion, including nearly \$500 million in restricted cash and short-term investments.
