AMR CORPORATION REPORTS A FOURTH QUARTER LOSS
OF \$387 MILLION -- ENDS QUARTER WITH \$3.4 BILLION
IN CASH AND SHORT-TERM INVESTMENTS, INCLUDING
A RESTRICTED BALANCE OF \$478 MILLION

Results Reflect Low-Fare And High Fuel-Price Environment That
Plagued Entire Industry In 2004

American Continues Intense Focus On Cutting Costs, Increasing Revenues

FORT WORTH, Texas -- AMR Corporation, the parent company of American Airlines, Inc., today reported a net loss of \$387 million in the fourth quarter, or \$2.40 per share. This compares to last year's fourth quarter loss of \$111 million, or \$0.70 per share. For the year, AMR posted a net loss of \$761 million, compared to 2003's loss of \$1.2 billion.

AMR's fourth quarter 2004 and 2003 results include a handful of special items, both gains and losses. Fourth quarter 2004 special items totaled a net gain of \$86 million, or \$0.54 per share, and primarily included a \$146 million gain on the sale of American's interest in Orbitz, \$42 million in severance charges, and \$21 million in aircraft charges. Fourth quarter 2003 special items totaled a net charge of \$16 million, or \$0.11 per share. For the full year, special items totaled a net gain of \$135 million in 2004, and a net gain of \$265 million in 2003.

"As expected, the fourth quarter proved to be a disappointing end to a very difficult year," said AMR Chairman and CEO Gerard Arpey. "AMR's results for the fourth quarter of 2004 reflect the economic woes that plagued the airline industry throughout 2004 - in particular, high fuel prices and a tough revenue environment."

During the quarter, Arpey said, the company paid 59 cents, or 67 percent, more per gallon of fuel than it did during the same period in 2003. That translated into \$477 million in

-- more --

incremental fuel costs, which added about one cent to AMR's cost per available seat mile of 10.69 cents. For the entire year, higher fuel prices cost AMR \$1.1 billion. "Unfortunately, low fares and the continuing high price of fuel are masking a lot of the progress we have made in reducing costs," he said.

Meanwhile, American's revenue per available seat mile declined 3.1 percent, driven by a 6.7 percent drop in passenger yield (passenger revenue per passenger mile). "As in the third quarter, low fares were driven by an excess of industry capacity, the continued growth of low cost carriers, and the pricing behavior of distressed competitors," Arpey said. He added that external factors such as these are not an excuse, but rather a reminder that American must sustain its intense focus on reducing costs and increasing revenue wherever and however possible.

"The issues we are grappling with are not new to us, and in fact, in 2004 we made a lot of headway in addressing them," Arpey said. "The productivity of our people, and of our fleet, is higher than it has ever been. We are running a smarter, more efficient airline than we were a year ago. We have improved our performance relative to the rest of the industry on both the revenue and cost sides of the ledger."

While these accomplishments were not enough to overcome a difficult environment, they did enable American to finish 2004 with more than \$3.4 billion in total cash and short-term investments (including \$478 million in restricted cash and short-term investments), Arpey said. American continued to make payments to all of its pension programs in 2004, contributing \$461 million to its defined benefit plans. These payments, on top of those made in recent years, have helped improved the funded level of the defined benefit plans from a low of 72

percent in 2002 to about 80 percent at the end of 2004. Since the beginning of 2005, American has contributed a further \$42 million to its defined benefit pension programs.

Arpey said he expects 2005 to be another very difficult year. However, the company does anticipate positive impacts from many initiatives announced or launched in 2004. These include reductions in domestic capacity, additional seats on the airline's MD80, 737, 767 and 777 fleets, several new international routes, a simplified domestic operation and various revenue-producing initiatives.

Several fleet decisions will be particularly helpful to the company going forward, Arpey said. These include decisions to withdraw from American's fleet in 2005 the equivalent of 15 mainline jet aircraft; to forgo delivery of 18 regional jets for the American Eagle affiliate, and to

-- more --

defer the delivery of 54 of 56 mainline jets from Boeing. The arrangement with Boeing allows American to postpone \$1.4 billion in capital spending previously planned for 2005 through 2007 and a total of \$2.7 billion in capital spending through 2010.

The workforce reductions American instituted last year, though difficult to make, also will help the company as it works to meet continuing financial challenges in 2005, Arpey said. The reductions resulted from a combination of factors, including fleet decisions, capacity adjustments and steps to simplify operations. Although the full extent of the reductions is still being determined, Arpey said the total impact currently stands at 3,200 jobs.

Despite much progress, AMR anticipates a loss during the first quarter of 2005. "This simply means our work is not done," Arpey said. "We must continue to focus on finding creative ways to lower costs, increase revenue and provide our customers with the kind of service they value."

Editor's Note: AMR's Chairman, President and Chief Executive Officer, Gerard Arpey, and its Chief Financial Officer, James Beer, will make a presentation to analysts during a teleconference on Wednesday, Jan. 19, from 2 p.m. to 2:45 p.m. EST. Following the analyst call, they will hold a question-and-answer conference call for media from 3 p.m. to 3:45 p.m. EST. Reporters interested in listening to the presentation or participating in the media Q&A should call 817-967-1577 for details.

Statements in this news release contain various forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which represent the Company's expectations or beliefs concerning future events. When used in this news release, the words "expects," "plans," "anticipates," "indicates," "believes," "forecast," "guidance," "outlook" and similar expressions are intended to identify forward-looking statements. Forward-looking statements include, without limitation, the Company's expectations concerning operations and financial conditions, including changes in capacity, revenues, and costs, future financing plans and needs, overall economic conditions, plans and objectives for future operations, and the impact on the Company of its results of operations in recent years and the sufficiency of its financial resources to absorb that impact. Other forward-looking statements include statements which do not relate solely to historical facts, such as, without limitation, statements which discuss the possible future effects of current known trends or uncertainties, or which indicate that the future effects of known trends or uncertainties cannot be predicted, guaranteed or assured. All forward-looking statements in this release are based upon information available to the Company on the date of this release. The Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise.

Forward-looking statements are subject to a number of risk factors that could cause actual results to differ materially from our expectations. The following factors, in addition to other possible factors not listed, could cause the Company's actual results to differ materially from those expressed in forward-looking statements: changes in economic, business and financial conditions; the Company's substantial indebtedness; continued high fuel prices and the availability of fuel; further increases in the price of fuel; the impact of events in Iraq; conflicts in

the Middle East or elsewhere; the highly competitive business environment faced by the Company, with increasing competition from low cost carriers and financially distressed carriers; historically low fare levels and fare simplification initiatives (both of which could result in a further

-- more --

deterioration of the revenue environment); the ability of the Company to reduce its costs further without adversely affecting operational performance and service levels; uncertainties with respect to the Company's international operations; changes in the Company's business strategy; actions by U.S. or foreign government agencies; the possible occurrence of additional terrorist attacks; another outbreak of a disease (such as SARS) that affects travel behavior; uncertainties with respect to the Company's relationships with unionized and other employee work groups; the ability of the Company to satisfy existing financial or other covenants in certain of its credit agreements; the availability and terms of future financing; the ability of the Company to reach acceptable agreements with third parties; and increased insurance costs and potential reductions of available insurance coverage. Additional information concerning these and other factors is contained in the Company's Securities and Exchange Commission filings, including but not limited to the Form 10-K for the year ended Dec. 31, 2003.

** The company did not record a net tax benefit associated with its 2004 or 2003 losses due to the company providing a valuation allowance. However, in 2003, the company reached an agreement with the IRS covering tax years 1990 through 1995 and as a result recorded an \$80 million tax benefit to reduce previously accrued income tax liabilities.
